

## Roll Container Cages

Roll cage trolley to transport goods in the warehouse is often used for logistics distribution in large supermarkets or logistics turnover between factory operations.

Our roll pallets are commonly used within the warehouse, distribution and retail sectors; however they also make a great mobile storage solution for many different environments.

Our distribution roll cages are available in both nestable and demountable formats.

The cages are available in 250 kg and 500 kg. Depending upon client requirement. We also have different types of accessories for the roll cages.
